## US Retail Operations

The US retail segment increased its revenue by $7.2 \%$ to US $\$ 10.265 \mathrm{~m}$ for the twelve months and there was an operating loss of US $\$ 2.359 \mathrm{~m}$ for the same period (US $\$ 2.650 \mathrm{~m}$ last year). Same stores sales in local currency increased $6.4 \%$ for the twelve months.

The board is satisfied with the progress of the US operation over the past five years but acknowledges there is still a long way to go before the business is proven up in the US market. Focus remains on improving the performance of the existing stores over the coming twelve months. The company's strategy moving forward is to refine the US property portfolio based on our learning's from the last 5 years in Chicago. The first step in this strategy has been the closure of the Water Tower store in Chicago in June, which will likely be replaced by a new store to be based in the eastern states of the US before Christmas this year. The board view this strategy as an extension to the existing test of the Michael Hill brand in the US market.

One store closed during the period giving a total of 8 stores operating at 30 June 2013.

In-house Customer Finance for North America
The Group established an in-house customer finance program in October 2012 in response to our Canadian provider withdrawing from the consumer credit market at the end of September 2012. Due to the strategic importance of consumer credit to our future revenue stream and the fact that there was no suitable replacement credit provider in the Canadian market the decision was made to bring that function in-house. This strategy not only secures our revenue in the Canadian market but will provide a strategic advantage as we build a valuable database of customers and their spending behaviours. After establishing the in-house customer finance program in October 2012 for our Canadian business it was extended to our fledging US operation where availability of consumer credit is paramount to success in our industry. The in-house customer finance function is being serviced by a US business partner based in Salt Lake City. Receivables from our in-house customer finance activity amounted to $\$ 7.723 \mathrm{~m}$ at 30 June 2013.

## Professional Care Plan (PCP)

PCP sales for the financial year were $\$ 33.072 \mathrm{~m}$. An amount of $\$ 16.208 \mathrm{~m}$ has been included as revenue in the segment figures stated above from the current and prior periods. As a result of a change in the estimation, brought about by management's review of another twelve months of usage data from the PCP program, an additional $\$ 4.242 \mathrm{~m}$ of PCP revenue was recognised in 2012-13 over and above what would have been recognised under the previous estimation formula, of which $\$ 1.942 \mathrm{~m}$ belongs to prior periods. In line with IFRS the full $\$ 4.242 \mathrm{~m}$ of additional revenue was brought to account in the 201213 period.

PCP sales are carried on the balance sheet as deferred revenue and then brought to revenue in the P\&L over the life of the plans (3 Year and Life Time) in proportion to the expected cost of meeting commitments under the PCP's. It is assumed that the liability for accounting purposes of the life time plans will expire within 10 years from date of sale. The estimate of expected commitments under the relevant PCP is based on a combination of our own experience and overseas research. These estimates will be updated as the company gathers usage data over the coming years. The costs of meeting the liability under the respective PCP's is brought to account in the period incurred.

The following table summarises the revenue treatment of the PCP business.

| The following figures are in NZ Dollars | Last Year | This Year |
| :--- | ---: | ---: |
| PCP sales collected for the year | $\$ 26.955 \mathrm{~m}$ | $\$ 33.072 \mathrm{~m}$ |
| PCP revenue brought to income for the year | $\$ 6.025 \mathrm{~m}$ | $\$ 16.208 \mathrm{~m}$ |
| Deferred revenue carried forward on balance sheet | $\$ 31.670 \mathrm{~m}$ | $\$ 47.047 \mathrm{~m}$ |

## Outstanding Tax Issues from Group Restructuring in 2008

It will be recalled that the Group currently has two unresolved tax matters relating to the way the Group valued and financed the sale of intellectual property from one of our New Zealand companies to one of our Australian companies.

In New Zealand, the Inland Revenue (IR) has questioned the manner in which the transaction was financed. In Australia, the Australian Taxation Office (ATO) has queried the value at which the intellectual property was transferred. The Group does not agree with the positions advanced by either the IR or ATO and believes the tax treatment and values it has adopted are correct. Discussions continue with both the IR and ATO within their dispute process frameworks, but it remains unclear when final resolution will be achieved in respect of either matter.
In New Zealand, the amount in dispute is $\$ 24.636 \mathrm{~m}$, being the tax effect of deductions claimed by the New Zealand Group from the date of the sale through to 30 June 2012. The tax effect of deductions for the 2013 financial year is $\$ 6.406 \mathrm{~m}$. In the event any tax liability was payable, the Group would also incur an interest expense.

In respect of Australia, the value at which the intellectual property was transferred was originally determined by reference to an independent valuation carried out by an internationally recognised firm and a deferred tax asset was raised in 2009 based on that valuation. The deferred tax asset balance at 30 June 2013 was $\$ 41.099 \mathrm{~m}$ as a result of depreciation of components of the intellectual property and a previously announced adjustment in value. The ATO has signalled that it has issues with aspects of that valuation which, if correct, would reduce the amount of depreciation able to be deducted by the Group. As noted, the Group does not accept the ATO's position and believes the ATO's views are based on a number of factual, legal and technical valuation errors. The Group has filed a formal, detailed response with the ATO, together with legal and valuation reports which support the Group's position.

Both matters are capable of being resolved by agreement, but if the Group is unable to find common ground with either the IR or ATO then further formal legal processes may be needed to achieve resolution. As is the case with almost all legal processes there is inherent uncertainty as to the outcome and the Group does not believe that the outcome of either process can be predicted or the range of possible implications quantified. The board does not consider that either of the above ongoing tax matters require a provision in the Group's 2013 financial statements but further detail is included at note 34 to the Financial Statements.

## Dividend

The Directors are pleased to announce a final dividend of $4.0 \phi$ per share (2012-3.5 $\$$ ), with no imputation credits attached for New Zealand shareholders and full franking credits for Australian shareholders. The dividend will be paid on Friday, 4 October 2013 with the record date being Friday, 27 September 2013. Including the 2.5 cent per share interim dividend paid on 3 April 2013, the total dividend for the year will be 6.5 , an increase of $18.2 \%$ on the previous corresponding period ( $2012-5.5 \$$ ).

Due to the internal restructuring of the Group in December 2008, the Company is unlikely to be in a position to impute dividends for some years, however this will depend on the performance of the segment in the coming years and also on the level of dividend to be paid in future periods.

Whilst the 2012-13 final dividend is fully franked to Australian resident shareholders, it is possible that future dividends will only be partially franked due to the likelihood of future dividend payout exceeding the level of tax liability in Australia. However, this position can change over time depending on a number of variables and the Company will keep the market informed each time a dividend is declared.

## Cash Flows / Balance Sheets

The Group has reported net operating cash flows of $\$ 52.345 \mathrm{~m}$ for the twelve months, compared to $\$ 52.131 \mathrm{~m}$ for the previous year.

The surplus from operations is a result of:

- Profit excluding non-cash items $\$ 50.227 \mathrm{~m}$
- Increase in deferred revenues from Professional Care Plan \$17.550m
- Increase in trade and other receivables \$(7.339)m
- Increase in inventory levels \$(7.088)m
- Other miscellaneous items \$(1.005)m

Net Cash Inflow from Operations Surplus for Year $\$ 52.345 \mathrm{~m}$
The Group's balance sheet continues to be sound with an equity ratio of $59.4 \%$ as at 30 June 2013 ( $60.1 \%$ in 2012) and a working capital ratio of 3.0:1 (3.1:1 in 2012).

## Summary

The Directors are pleased that all four segments were able to improve their results in 2012-13 despite continued pressure on the retail sector. Revenue growth continued to be difficult to achieve in all markets especially over the second half of the financial year. A focus on improving the existing business will continue during 2013-14 as well as continued store openings when suitable sites become available.

The Directors are satisfied with the overall performance and they remain confident in the continued growth and profitability of the group.
